SOFTWARE

MANAGE MONITOR AND SCHEDULE

RMS - An Innovative Software Solution

The AMX Resource Management Suite is a line of software solutions designed for IT professionals, facility managers and meeting/classroom users to help them manage, monitor and/or schedule up to 1,000 rooms and an unlimited number of assets. It provides the ability to schedule rooms and equipment, track assets via RFID, monitor and manage equipment remotely and reduce energy expenses.

ClassroomManager Brochure
This all-encompassing software suite delivers a simple way to monitor and maintain classrooms, auditoriums, labs and offices, and their associated electronic devices.

ExhibitManager Brochure
Offers managers of museums and theaters a simple option for monitoring and maintaining the sights, sounds and interactive features involved in exhibits.

HomeManager Brochure
Perfect to allow homeowners to be proactively notified of maintenance and security issues and offers dealers the ability to generate additional revenue and deliver enhanced customer service.

IntelligentManager Brochure
Delivers reliable, efficient control and management of networked equipment for government facility-wide operations and military installations.

MeetingManager Brochure
MeetingManager fills the void between the most popular room scheduling systems and the automation/management of room resources including audio, visual and environmental systems.

NSS-RPM

Rapid Project Maker

OVERVIEW

Design, configure and deploy AMX systems in less than an hour with Rapid Project Maker (RPM).

RPM is a cloud-based configuration tool that allows AV technicians or IT professionals to easily configure an AMX system by using a step-by-step wizard-based approach. RPM simplifies more than just the configuration - it is a comprehensive tool designed to help throughout the process, from start to finish. With no programming required, the user can configure the project, create a user interface and generate step-by-step instructions on how to install the system. Users can store their projects on AMX.com, allowing installers to access and manage them from anywhere.

Welcome to the revolutionary world of RPM, where time-consuming programming is a thing of the past.

Visit our RPM portal, www.amxrpm.com, to request an RPM login or learn more about RPM.

FEATURES

- **Cloud-Based Tool** – Design, configure and manage systems over the web – no software required.
- **No Programming Required** - Dramatically simplifies configuration of an AMX control system.
- **Pre-Configured Systems** – Get a head start using one of the pre-populated templates.
- **Automatically Generates Project Documents** - Simplify the installation process with detailed step-by-step instructions, an equipment list of AMX products and third-party device mapping.
- **Access Any Project Online** - Reduce on-site service calls by saving and managing projects on AMX.com.
- **Help Tips** – Never get lost or confused - each step in RPM has context sensitive help tips to guide the user through the process
- **Build Macros** – Design custom macros to automate different activities

BENEFITS

- **Configure Systems in Less Than an Hour** - With no programming required, complete multiple installations with greater consistency, reliability and efficiency than ever before
- **Create, Save and Manage Projects Anywhere** – Access and edit projects from any web-enabled device that supports flash and reduce on-site service calls
- **No Training Required** - Entry-level technicians can follow RPM's step-by-step process to configure an entire project from start to finish

SPOTLIGHT
RPM takes the time, frustration and difficulty out of automating conference room control systems. Visit our RPM portal, www.amxrpm.com, to learn how you can use RPM to deploy the Perfect Meeting today.

COUNTRY OF ORIGIN: UNITED STATES
To satisfy the requirements/regulations of existing or future government programs, this two-letter code is being provided to designate the country of origin for this product.

UNITYhome

Residential Sales Solutions Program

OVERVIEW

UNITYhome by AMX gives U.S. residential dealers the opportunity to generate a serious spike in sales. Due in large part to the sales program's key element – free programming and touch panel design handled by AMX programming experts – dealers can focus their time and efforts on increasing productivity and profitability. Dealers are now able to win more jobs and increase profits by focusing more attention on sales and less on programming.

Since AMX technology is engineered with the capabilities and flexibility most systems do not have, dealers can offer customers a wider selection of more advanced home automation concepts.

At this time, the UNITYhome program is available to U.S. residential dealers only. To be eligible, dealers need only purchase an AMX Enova® DGX 16 or 32 Digital Media Switcher or HDMI UTPro Matrix Switcher, and any AMX Modero X® Series Touch Panel. The free programming and touch panel design provided by AMX covers the following capabilities for up to 32 residential rooms/zones: video distribution, audio distribution, lighting, HVAC, weather, security cameras, pool/spa control and intercom.

Wholly engineered for AV over a network, the AMX Enova® Digital Media Switcher serves as the ideal centerpiece of a connected home, managing and distributing analog and digital audio and video including HDMI/HDCP from up to 16 or 32 sources to 16 or 32 destinations. These switchers are compact, pre-configured units with a controller, switcher, transcoder, intelligent scaling, multi-format inputs, local and remote distribution and more.

A great-looking, easy-to-use interface has been widely considered the most important aspect in ensuring an exceptional end-user experience. With the multi-award winning, panoramic and widescreen Modero X Series touch panels, a dealer can be assured that homeowners will have a user interface that is simply beautiful and beautifully simple.

COMMON APPLICATION

UNITYhome is a great choice for dealerships needing simplified programming options or have limited programming resources since UNITYhome requires no programming on the part of the dealer. UNITYhome is also ideal for dealers new to the residential market and to those who have previously focused on the commercial sector, but could use some support targeting homeowners. As for the homeowner, UNITYhome offers price-sensitive customers a high-performance whole-home solution that can be customized for their specific needs.

FEATURES

- UNITYhome was designed to support a wide variety of system configurations and designs. To establish a baseline for system design, we developed a set of parameters that will assist in system building and handle supported AMX and third party devices including distributed video, distributed audio, environmental controls and user interfaces. Devices and systems outside of these parameters can be discussed for potential support.
- UNITYhome covers these basic amenities for up to 32 residential rooms/zones: video distribution, audio distribution, dedicated interface for each video zone, lighting, HVAC, weather, security cameras, pool/spa control and intercom.

© January 2013 AMX. All rights reserved. AMX does not assume responsibility for any errors or omissions.

- Marketing materials are included in the program to help dealers present the ultimate customer experience to homeowners.
  - ***Simply Beautiful and Beautifully Simple* Brochure**: Enables end users to imagine life at home with AMX home automation
  - **Simplifymyhome.com Website**: Highlights the endless possibilities of control and home automation, while teaching homeowners everything they need to know about purchasing a system to meet their specific needs.
  - **Residential Information Sheets**: One page documents describing key AMX Residential products
  - **Customizable Installation Yard Signs**: Inexpensive way to promote an AMX dealership
  - **Residential End User-Focused Advertisements**
  - ***The Showcase* magazine**: Lifestyle magazine that allows potential clients to enter the homes of current and past clients who have AMX solutions installed in their homes
  - **AMX UNITY User Interface Designs**

GOING GREEN

The AMX Energy Management solution offers homeowners an extremely simple way to monitor and manage their energy consumption at just a glance of their touch panel. Electricity, water, natural gas/propane and oil usage can be monitored in daily, weekly, monthly and annual increments. Alerts can easily be created so that the homeowner has plenty of time to adjust their usage before it becomes an issue.

TRAINING AVAILABLE

- AMX requires that each participating UNITYhome dealer have a team member certified to install AMX equipment.
- If no team member is certified, AMX offers a two-day class that covers the basics of AMX system installation including AMX equipment wiring schemes, setting device addresses and verifying configurations using NetLinx Studio.

READ MORE ABOUT IT

To learn more about the AMX UNITY program, visit **www.amx.com/home**, or contact your AMX representative.

SPECIFICATIONS

DISTRIBUTED VIDEO

- Up to 32 zones of video (Enova DGX 16x16, Enova DGX 32x32, or HDMI-UTPro)
- Up to 32 distributed video sources plus local sources
- 1 display per room
- 1 AV Receiver per room
- Native Video Sources
  - Kaleidescape
  - Request MP Plus

DISTRIBUTED AUDIO

- Up to 32 zones of audio
  - AutoPatch Precis DSP 8x8, 18x18, or Tango Controller
  - Native Audio Sources
    - Tango AM/FM Tuner
    - Sirius® SCH2P Sirius Tuner
    - Autonomic® MMS-2 and MMS-5
    - Kaleidescape® Music Server (4 outputs)
    - iPort® (232 only) up to 2
    - Request Music Server
    - Grace Digital® Tuner Pro (available Q4,2012)

ENVIRONMENTAL CONTROLS

- **Lighting Control** - Up to 32 zones of Lighting Control
  - AMX Clear Connect
  - Lutron® Radio Ra2
  - Lutron Homeworks
  - Vantage® InFusion
- **HVAC** - Up to 16 ViewStat Color Thermostats
- **Pool Control** via Jandy
- **Panel to Panel Intercom** including up to 2 Metreau® Entry Communicators
- **Security Cameras** - Up to 16 IP Security Cameras
- **iWeather and Internet Weather** Image integration

USER INTERFACES

- Up to 36 total touch panel user interfaces
  - Up to 18 touch panels
    - MXT/MXD-2000XL
    - MXT/MXD-1900XL
    - MXT/MXD-1000
    - MXT/MXD-700
    - MVP-9000i
    - MVP-5200i
    - NXD-435P
    - Any 800x480 resolution touch panel
    - Any 1024x768 resolution touch panel
    - Apple® iPad
  - Up to 18 R4 Remotes and iPhone/iPod Touch
- Up to 3 Metreau Keypads per room
  - 1 - 6 button
  - 1 - 7 button
  - 1 - 13 button

Advanced macros included for an additional fee.

TPC-APPLE

Authorized AMX Touch Panel Application for Mobile Devices

Apple iPad	(FG2263-06)
Apple iPhone/iPod Touch	(FG2263-05)

OVERVIEW

TPControl enables Apple® mobile devices to transform into a fully functional touch panel for controlling AMX system platforms. This easy-to-use application provides real-time, touch control of AV systems, lighting, shades, room temperatures and more. These mobile devices can seamlessly communicate with an AMX control system via 3G, GPRS and EDGE cellular networks, or Wi-Fi, to allow the convenience of remote use. TPControl was created by AMX APP™ (Authorized Product Partner) Touch Panel Control, and is the only Apple mobile app for control that AMX supports because it was specifically designed and thoroughly tested for use with AMX equipment.

Use the TPDesign4 application to create the user interface and then use TPTransfer (available as a separate download) for licensing and transferring the TP4 file to the mobile device.

Supported devices include: Apple iPhone, iPod Touch and iPad.

COMMON APPLICATION

Ideal in residences for wireless control in home theaters and whole home systems and perfect in boardrooms/conference rooms for controlling AV equipment for presentations or training. Use your existing Apple device to control your AMX solution and even take control remotely using the cellular network.

FEATURES

- **VoiceControl** - Using Speech-to-Text and Text-to-Speech functionality within TPControl allows you to talk to your control system and have it talk to you. For example, you say "Turn the entry lights on" and TPControl initiates the command and replies "The entry lights are on" when completed
- **AppControl** - Launch installed applications directly from TPControl; start an SMS, launch an email client, web pages and much more without leaving the TPControl environment
- **Multi-Profiles** - Dynamically and instantly change connection profiles such as office or home, connecting seamlessly to different control systems from the same device
- **Intercom** - Converse from TPControl to devices such as the AMX Metreau Communicator, AMX Intercom enabled touch panels, and other TPControl enabled devices
- **TPCloud** - Cloud power lets you update TP4 files, change device settings or even apply tokens to TPControl devices, right from the My Account section of the Touch Panel Control website
- **eICSP** - Encrypt, Verify and secure ICSP data for your local and remote connections

ADDITIONAL FEATURES

TPDESIGN Supported Features

Transfer your custom TP4 designs, created using AMX's TPDesign4, to iPad/iPhone/iPod Touch (utilizing TPTransfer, included).

- Page Flips and Popups
- Sounds
- Multi-touch
- Keyboards/Keypads
- Multistate Levels/Levels
- Dynamic Images/Scaled Dynamic Images
- Multistate Buttons
- Full Feedback
- Supports multiple ports
- Loopback Port Support for most commands
- Native TP4 File support
- Most G4 commands, as well as legacy G3 commands
- Unitype Fonts
- Font Effects
- Borders - PopUp Show/Hide Effects
- Opacity
- Chameleon Images
- Multiple resolution support (Android™ only)

© January 2013 AMX. All rights reserved. AMX does not assume responsibility for any errors or omissions.

TPC-ANDROID

Authorized AMX Touch Panel Application for Mobile Devices

Android Tablets	(FG2263-08)
Android Phone	(FG2263-07)

OVERVIEW

TPControl enables Android™ mobile devices to transform into a fully functional touch panel for controlling AMX system platforms. This easy-to-use application provides real-time, touch control of AV systems, lighting, shades, room temperatures and more. These mobile devices can seamlessly communicate with an AMX control system via 3G, GPRS and EDGE cellular networks, or Wi-Fi, to allow the convenience of remote use. TPControl was created by AMX APP™ (Authorized Product Partner) Touch Panel Control, and is the only Android mobile app for control that AMX supports because it was specifically designed and thoroughly tested for use with AMX equipment.

Use the TPDesign4 application to create the user interface and then use TPTransfer (available as a separate download) for licensing and transferring the TP4 file to the mobile device.

Supported devices include:

- Android Smartphones and Android Tablets with the TPControl application is available for download at Google Play or the AppsLib Marketplace
- NEW! Amazon Kindle Fire which uses the Android Tablet License with the TPControl application is available for download at the Amazon Appstore
- For an up-to-date list of all supported devices, please visit www.touchpanelcontrol.com.

COMMON APPLICATION

Ideal in residences for wireless control in home theaters and whole home systems and perfect in boardrooms/conference rooms for controlling AV equipment for presentations or training. Use your existing Android device to control your AMX solution and even take control remotely using the cellular network.

FEATURES

- **VoiceControl** - Using Speech-to-Text and Text-to-Speech functionality within TPControl allows you to talk to your control system and have it talk to you. For example, you say "Turn the entry lights on" and TPControl initiates the command and replies "The entry lights are on" when completed
- **AppControl** - Launch installed applications directly from TPControl; start an SMS, launch an email client, web pages and much more without leaving the TPControl environment
- **Multi-Profiles** - Dynamically and instantly change connection profiles such as office or home, connecting seamlessly to different control systems from the same device
- **Intercom** - Converse from TPControl to devices such as the AMX Metreau Communicator, AMX Intercom enabled touch panels, and other TPControl enabled devices
- **TPCLockOut** - With TPCLockOut enabled, the "Home", "Back", "Menu/Setting/", and "Search" button functions are restricted, which means that TPControl retains application focus and protects administrative device settings from user access
- **TPCloud** - Cloud power lets you update TP4 files, change device settings or even apply tokens to TPControl devices, right from the My Account section of the Touch Panel Control website
- **eICSP** - Encrypt, Verify and secure ICSP data for your local and remote connections

ADDITIONAL FEATURES

TPDESIGN Supported Features

Transfer your custom TP4 designs, created using AMX's TPDesign4, to Android™ (utilizing TPTransfer, included).

- Page Flips and Popups

NDT-VKP

Virtual Keypad

(FG3005-01)

OVERVIEW

Whether you are around the corner or across the country, you can access your NetLinx Control System over a secure web address and instantly monitor and control any device on your system. The NDT-VKP Virtual Keypad provides cost-effective remote management, maintenance and simple system interaction for systems that require remote access or that have simple control requirements.

D-TOOLS CERTIFIED PRODUCT
This product can be found in the D-Tools manufacturer product database and specified as a third party device when building and proposing a system using D-Tools System Integrator software.

COUNTRY OF ORIGIN: UNITED STATES
To satisfy the requirements/regulations of existing or future government programs, this two-letter code is being provided to designate the country of origin for this product.

FEATURES

- Customizable 12-button keypad or Apple iPhone/iPod touch interface
- Uses standard NetLinx commands to label buttons, select styles, manage button feedback and display text (sample NetLinx code available)
- Does not require additional software on client PC
- Does not require HTML pages to be downloaded to the NetLinx master

RMS-ENT

RMS Enterprise

Location License	(FG3004-01)
25 Location License Bundle	(FG3004-25K)
100 Location License Bundle	(FG3004-100K)
300 Location License Bundle	(FG3004-300K)
Education Discount 25 Location License Bundle	(FG3004-25EK)
Education Discount 100 Location License Bundle	(FG3004-100EK)
Education Discount 300 Location License Bundle	(FG3004-300EK)

OVERVIEW

RMS Enterprise is a scalable client/server based software for IT and AV managers that provides remote management capabilities for AV assets and building systems. The rich web application offers a new widget-based dashboard with enhanced graphics and navigation including visual bar graphs, Hotlists, expanded device support - all to simplify operation, support and security. RMS Enterprise contributes to energy reduction initiatives and extending useful life of devices. For example, IT and AV managers can improve SLA response times and reduce equipment downtime. For integrators, RMS Enterprise natively supports the AMX Standard NetLinx API (SNAPI) which greatly simplifies adding control and monitoring to any RMS system.

NOTE: Upgrade from RMS 3.3 is available at no charge with the purchase of the Software Maintenance Agreement (RMS-ENT-SMA).

RMS EDUCATIONAL DISCOUNT BUNDLES: RMS Location Licenses with discounted pricing listed in the Part # section above are available only to qualified educational institutions that are members of the AMX Education Alliance Program. Membership in the EAP will be verified by AMX upon order submission. For more information about the AMX EAP, please visit amxallies.com.

The RMS Software Maintenance Agreement is a required part of an initial RMS Enterprise installation. The first year of RMS-ENT-SMA is included in the pricing for RMS-ENT. End users will be notified prior to expiration for renewal. The renewal/upgrade price is based on the scope of each RMS installation. For questions about pricing, please contact your AMX Representative.

COMMON APPLICATIONS

Resource Management Suite Enterprise is a robust solution for IT and AV managers to centralize the monitoring and management of AV devices and building systems across a campus or facilities worldwide.

FEATURES

- **Enterprise Scalable** – Can be deployed on a single server or server farm with fail-over server redundancy to ensure uptime
- **Rich Web Application** – Offers new widget-based dashboard with enhanced graphics and navigation including visual bar graphs, Hotlists, expanded device support, energy monitoring and more – all to simplify operation, support and security
- **Energy Management** – Reduce energy consumption and extend useful life of devices with enhanced reporting
- **NEW Annual Software Maintenance Agreement** – Real-time software updates, access to a dedicated RMS Technical Support team provides the perfect backup support
- **Education Licenses Available** – RMS Location Licenses are provided at no charge with purchase of the Software Maintenance Agreement (RMS-ENT-SMA) available only to qualified educational institutions that are members of the AMX Education Alliance Program – for details visit www.amxallies.com
- RMS 3.3 will remain available to support the built-in or wide variety of external scheduling applications
- **Enterprise Security Features** - Software supports Authentication, Encryption and Cross-Site Scripting to prevent security threats
- **LDAP User Management** - LDAP protocol provides user management, authentication required by large enterprises
- **Service Oriented Architecture** - (SOA) model provides web services for client communications over well-known ports
- **Reporting** - Report manager lets you select the metrics and define summaries with graphs and charts, and can be exported direct into MSWord, MSExcel, MSPowerPoint, RTF, CSV, PDF and HTML

© January 2013 AMX. All rights reserved. AMX does not assume responsibility for any errors or omissions.

DEALER BENEFITS

- **Easy to Integrate Devices** – RMS Enterprise natively supports the Standard NetLinx API (SNAPI) which greatly simplifies adding control and monitoring to any RMS system
- **Remote Monitoring** – Dealers have the option of providing remote support through network access to a customer's system
- **RMS 3.3 Compatible** – Your RMS 3.3 customers can upgrade to RMS Enterprise and gain new management features without making code changes

CUSTOMER BENEFITS

- **Scalable** – May be used in a multi-server deployment such as a web farm for scalability, redundancy and load balancing
- **Rich Web Application** – Centralized Dashboard provides real time system updates, monitors device status, energy usage with the look and feel of a desktop application
- **Energy Management** – Track usage from building to device level, and automatically turn off devices in rooms not in use
- **Software Maintenance Agreement** – Provides top-tier technical support, cost savings and easy budget management

DID YOU KNOW?
Did you know that RMS Enterprise can calculate your monthly room electrical energy costs and electrical carbon footprint?

SPECIFICATIONS

SERVER HARDWARE REQUIREMENTS

- Processor: Dual core Intel Xeon processor @ 2.67GHz (or equivalent)
- Memory: 4 GB
- Display: 1280 x 1024 resolution
- Hard Disk: 1 GB available space for RMS Enterprise application files.

(**NOTE:** Database size varies depending on the installation.)

SUPPORTED SERVER OPERATING SYSTEMS

- Microsoft Windows 2003 Server (with SP2):
  - Web Edition
  - Standard Edition / Standard x64 Edition
  - Enterprise Edition / Enterprise x64 Edition
- Microsoft Windows 2003 Server R2:
  - Standard Edition / Standard x64 Edition
  - Enterprise Edition / Enterprise x64 Edition
- Microsoft Windows 2008 Server (x86 and x64):
  - Web Edition
  - Standard Edition
  - Enterprise Edition

ADDITIONAL SERVER SOFTWARE REQUIREMENTS

- Java: Java 6 Runtime Environment (SUN JRE 6.0) required.
- Tomcat: Tomcat v6 required - version 7 is not supported.

Note: The following applications are not required on the server, but would be needed in order to view the RMS UI and help files directly on the server.

- Internet Explorer v8 or v9
- Adobe Flash v10
- Adobe Acrobat Reader

SUPPORTED SERVER OS LANGUAGES

- Arabic
- Chinese (Simplified, PRC)
- Chinese (Classic, HK)
- Flemish (Dutch)
- English
- French
- German
- Greek
- Italian
- Japanese
- Portuguese (Portugal)
- Russian
- Spanish
- Turkish

SUPPORTED DATABASE PLATFORMS

- Microsoft SQL Server 2008 Enterprise Edition x86
- Microsoft SQL Server 2008 Standard Edition x86
- Microsoft SQL Server 2008 Express Edition x86
- Microsoft SQL Server 2008 R2 Enterprise Edition x64
- Microsoft SQL Server 2008 R2 Standard Edition x64
- Microsoft SQL Server 2008 R2 Express Edition x64

Note: The "Express Editions" are suitable for systems with less than 300 rooms only (download available free from Microsoft).

RMS-ENT-SCH

RMS Enterprise Scheduling License

(FG3004-02)

OVERVIEW

RMS Enterprise Scheduler eliminates two major barriers to meeting effectiveness. It assists attendees in locating meeting rooms by displaying the scheduled appointments on a touch screen in the meeting room and adjacent to room entrances. It also eliminates delays in meeting start times by allowing users to pre-configure their room facilities, eliminating the time typically spent on equipment setup.

COMMON APPLICATIONS

RMS Enterprise Scheduler is a comprehensive application that facilitates the scheduling, calendaring and support of corporate conference rooms, K-12 and higher education classrooms, multi-use conference facilities and other venues.

FEATURES

- **Calendaring & Scheduling** – Schedule room facilities from any touch panel or PC
- **Pre-Configuration of Assets** – Ensure that conference room technology is set up and ready when a meeting starts
- **Appointment Information** – Displays room schedule along with appointment details to assist and inform meeting attendees
- **Integration with Common Platforms** – Integrates with Exchange, Lotus Notes, GroupWise, PeopleCube, EMS, Planon and R25

KEY CUSTOMER BENEFITS

- **Increase Efficiency** - Schedule meeting rooms and conference facilities throughout your enterprise
- **Increase Effectiveness of Meetings** - Pre-configure technology in meeting spaces so meetings start on time, with no technology hassles
- **Maximize Uptime** - Centralized scheduling ensures that maintenance windows occur when meeting facilities are not in demand
- **Encourage Usage of Technology** - Eliminate the technology fear factor so users will gain confidence in using conference room equipment
- **Feature-Rich** - Supports many scheduling features including room and location, start and end time/date, subject and meeting details, scheduler/owner and attendee list, macros for room automation and manual preset execution

DID YOU KNOW?
Did you know that RMS Enterprise can calculate your monthly room electrical energy costs and electrical carbon footprint?

RMS-ENT-SMA

RMS Software Maintenance Agreement

(FG3004-K)

OVERVIEW

Software Maintenance Agreement (RMS-ENT-SMA) for RMS Enterprise solutions including upgrades, updates and top-tier Technical Support. Available in one-year increments, this renewable service plan provides organizations with a maintenance program that makes it easy to keep RMS current combined with AMX Technical Support.

The RMS Software Maintenance Agreement is a required part of an initial RMS Enterprise installation. End users will be notified prior to expiration for renewal. The price is based on the scope of each RMS installation. Contact AMX Customer Service for a quote. For questions about pricing, please contact your AMX Representative.

NOTE: Upgrade from RMS 3.3 is available at no charge with the purchase of the Software Maintenance Agreement (RMS-ENT-SMA).

FEATURES

- **Technical Support** – With RMS-ENT-SMA, end users have direct access to AMX's first-class technical support team to answer their RMS questions
- **Software Updates and Upgrades** – Enhanced, improved and/or modified versions that replace the existing version of RMS plus minor software releases, usability and performance enhancements
- **Software Release Notifications** – Receive notices when new software is available for download from AMX

CUSTOMER BENEFITS

- **Top-Tier Tech Support for End Users** – Telephone and web-based direct to AMX Tech Support
- **Cost Savings** – A one-year maintenance program is less than the cost for buying individual upgrades
- **Easy Budget Management** – A renewable maintenance program makes it easy to budget for future expenses
